Tools and Applications: Visual Studio, Visual Studio Code, SQL Server Management Studio, Sublime Text, Adobe Photoshop, WordPress, Acrobat, Reaper, Audio DAW, XCode, DaVinci Resolve video editing program, Asana, Shopify, Slack **,** Word, PowerPoint, Excel.

Languages: English (fluent), French (secondary)

Experience

MARCH 2020 - PRESENT

310 Nutrition - Full Stack Developer

- Developed a mobile application with React Native that consumes blog and recipe data from Shopify and presents them with associated images in a well-designed layout. Utilized React Native's AsyncStorage API to provide the ability to save the recipes. The mobile app is developed and deployed iteratively with version control using Git and GitHub. Link: https://apps.apple.com/us/app/healthy-smoothie-recipes/id1668899326?platform=iphone
- Developed an in-house application to filter, organize and store products and customer orders by coupon code using PHP, SQL, and React. Developed an API endpoint in PHP, and presented the portal data in graphs and charts using React JS, enabling the marketing team to better identify target customers and purchase orders.
- Developed an online user review application on reviewology.com. The endpoint stores the product's id and user's rating in a SQL database while a php cron job selects all the reviews associated with unique product ids, and calculates an average rate. Link: https://reviewology.com/list/meal-replacement-shakes/
- Developed custom features for 310nutrition.com, kashmerekollections.com, reviewology.com, and mealreplacementshakes.com using Liquid, jQuery, PHP, HTML, and CSS
- Developed a Hydrogen application using React JS and Shopify API.
- Participated in daily standup and followed agile methodology for product development.

MARCH 2019 - PRESENT

Self - Full Stack Developer

- Developed custom API models and endpoints in .Net to recreate products, collections, and other features for 310nutrition.com. Developed the frontend, administrator dashboard, and consumed the custom API with React.

- Designed mockups and wireframes in Photoshop and developed the front end of websites for various personal projects and clients.
- Developed WordPress templates and themes for small businesses and other projects using PHP and React JS
- Analyzed and discussed business and website needs carefully with clients

SEPTEMBER 2019 - JANUARY 2020
Scrubs Data - Full Stack Developer

- Worked closely with the project lead and a team of developers to review and analyze application requirements.
- Developed web services, and user interface components for a discussion forum.
- Developed system administrator dashboard.
- Developed a medical license lookup tool.
- Developed the application using SQL, .NET core, ADO, and React JS.
- Developed web services, API controllers, and API models.
- Implemented code review process with the development team to identify errors, defects, and made suggestions on code refactoring.
- Implemented version control using Git.
- Updated team and project lead daily with accomplishments, blockers, and goals during daily standups.
